

(a) κ : the material sphere $|\hat{x}| = 1$, with the referential principal axes $\underline{u}_i$

(b) κ_t : the image $\underline{r} = \underline{\tilde{F}}\hat{\underline{x}}$, an ellipsoid with semi-axes λ_i along $\underline{v}_i$; same scale as (a), dashed = the original unit sphere

(c) every image point satisfies (3.110)

(d) $\lambda_3 \leq \mu \leq \lambda_1$: the extremal property
